

THINK GREEN

**ALWAYS
EVERYWHERE
EVERYTHING**

Dear Parents

We are delighted to present to you yet another successful edition of our magazine 'News Buzz'. Our excitement knows no bounds and this we owe to the triumphant moments and memories built with our children at school, each year.

At Bhatnagar International Foundation School, we quench a child's thirst for knowledge, satiate their hunger for success, stoke their passion for perfection, groom their sensibilities for social values and nurture them as model citizens of society.

It gives us immense pride when children express their thoughts confidently and eloquently. The new academic session of 2019-20 began with glorious moments when our children of Grade III addressed the gathering on the 'Importance of being sensitive towards Mother Earth' and students of Grade II expressed their love for their mummies on 'Mother's Day'.

We hope you enjoy and relive the moments created by our dear children.

Happy Reading !!

Keep it *GREEN*, Keep it *CLEAN*!

Everything in the world around us is built upon Earth, grows on Earth or depends on the environment of the Earth in some way or the other. As we know, this is the only planet where survival is possible, so it becomes our duty to save our 'Mother Earth'.

With the aim of sensitising our children about how callous actions and ignorant behaviour of humans are fast depleting the Earth of its natural resources, the school organised various activities as a prelude to 'Earth Day'. Parents of Grade III were invited for the 'Earth Day Show'.

To sensitize the children to become crusaders for environmental conservation, Bhatnagar International Foundation School organized celebration of 'Earth Day'.

Earth Day: Join the fight, Do what's right!

A special assembly was conducted wherein the students of Grade III shared their views about the 'Importance of Saving Earth' and the measures that can be adopted to save our planet.

A hand-out was given to the students based on the significance of our planet and suggestions on how to keep our environment clean and green. Later, a special session was conducted in the class so that every child could come out with environment-friendly ideas for Saving Earth. The children were made aware that EVERY DAY IS EARTH DAY and the purpose of celebrating Earth Day is to help keep our grass green and our skies blue with more trees and no pollution. Grade III children, conveyed a special message to the entire school through a special assembly about the various environmental issues and how each of us can make a difference by making small adjustments in our daily rituals and habits. The celebration was based on the inbred philosophy of the school that our children are our future and the greatest legacy one can pass on to the future generation is a cleaner and greener environment.

It was heartwarming and insightful to witness strong messages on 'Save the Environment - Save Earth' presented by our little Samaritans through creative group activities. Through their colourful performances, the students motivated their peers to take the cause forward by spreading the message and taking action before it's too late!

To love year after year.*

Happy Mother's Day

Mother's Day

All that I am, or hope to be, I owe it to my angel mother.

Mothers are the greatest blessing to mankind.

It was our honour and privilege to host all the beautiful mothers on Mother's Day.

It is rightly said - "A mother understands what a child does not say".

Our children of Grade 2 at Bhatnagar International Foundation School, put together an entire show in celebration of their mothers – the blessing their mothers are to them.

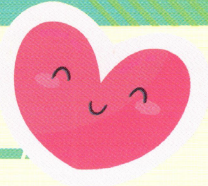

With hearts full of love and twinkle in their eyes, the children shared, how loved and adored their mommies are.

The day began by thanking the Almighty for all his blessings which was followed by a skit depicting the multitasking roles a mother fulfils along with some exciting dance and song performances.

Students vividly proved that a mother is a walking miracle. They showcased the belief that, the strength of motherhood is greater than any natural law.
